IMPORTANT EVENT DURING THE REPORTING PERIOD

In the ordinary general meeting of 20 April 2017, AEROSTAR shareholders approved the distribution of the net profit of the year 2016, in amount of lei 56.471.594,73 lei, as follows:

- **Allocation as legal reserve of the reinvested profit in amount of lei 9.094.374,24**
- **Allocation as statutory reserve for the working capital in amount of lei 33.672.250,49**
- **Allocation for dividends of the amount of lei 13.704.970,0** and set a gross dividend per share of lei 0,09, corresponding to a share with nominal value of 0,32 lei
- **Set the date for the payment of the dividends for the date of 20 September 2017.**

The distribution of the dividends due to the shareholders of the company for the year 2016 will be made in accordance with the legal provisions applicable.

The costs with the distribution activity will be charged from the value of the net dividend of each shareholder.

2.REVIEW OF AEROSTAR ACTIVITY FOR HALF- YEAR 2017

In accordance with the classification of activities in the national economy, the main object of activity is manufacturing of aircraft and spaceships- CAEN code 3030.

The main field of activity is production.

AEROSTAR BUSINESS DEVELOPMENT FOR HALF-YEAR 2017

AEROSTAR operates on the global market, highly competitive, where the dynamics of the dominant players- the large companies which integrate final products- pursue with consistency their major objective of business growth.

While the growth dynamics seems not to be affected by the geopolitics of the recent and present periods, the Original Equipment Manufacturers focus on those levers able to support growth: key cooperations within the supply chains, growing their share of the services and support business associated with their products.

The approaches related to innovative technologies, the progress in the digital transformation as well as cybersecurity are the aspects which are setting the growth coordinates in the aviation and defence industry.

During the first six months 2017, AEROSTAR business is aligned with the specific trends in the field of aviation and defence at global scale.

Further on, AEROSTAR's main lines of business are:

- Manufacturing of aviation products
- MRO commercial aircraft
- Aero & ground systems for defence, production and integrations

AEROSTAR maintained its positioning as number 1 in Romania for its object of activity.

- Number 1 in aviation manufacturing
- Number 1 in maintenance of commercial aircraft

Aerostar is a significant supplier for the solutions in the field of aero & ground defence systems.

AEROSTAR is a regional leader in these market domains.

AEROSTAR holds a significant footprint in the global programmes of aeronautical manufacturing.

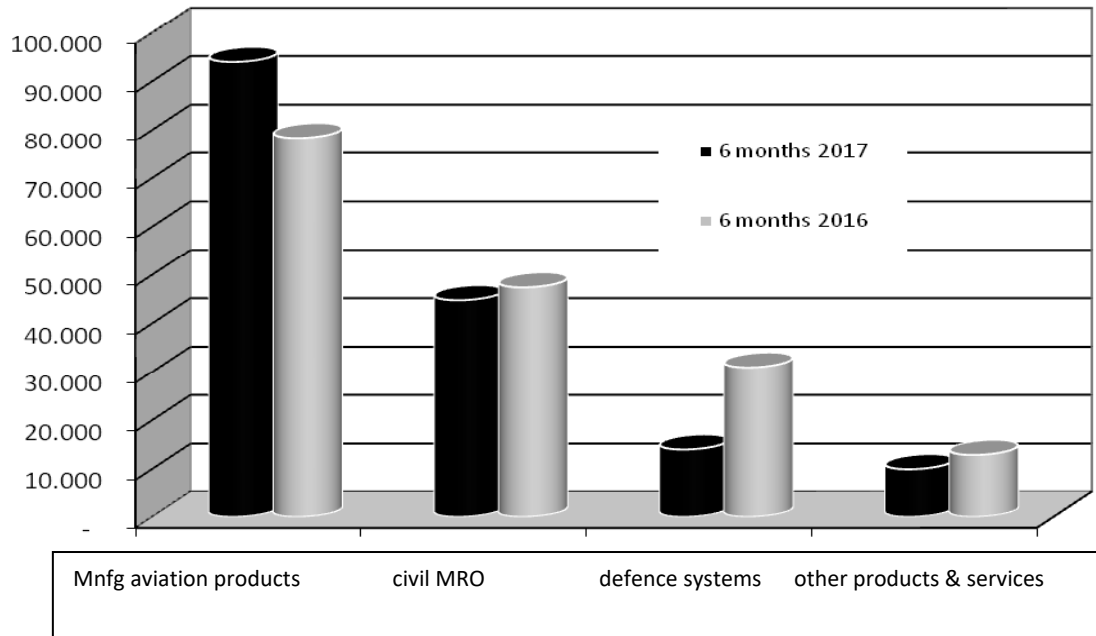

Aerostar fulfills at a high level the performance and competitiveness criteria and was specifically distinguished by AIRBUS and SAFRAN Landing Systems on the occasion of their annual meetings with their suppliers in the manufacturing programmes.

The positioning on the market is characteristic for the tier 2 suppliers in the global supply chains in the aviation industry.

AEROSTAR's contribution in the supply chains of the two dominant global players, AIRBUS and BOEING, is based on the technological development and of the production systems.

The total revenues during the first semester 2017 were in amount of 184.973 thousand lei. The expenses made to achieve these revenues were in amount of 153.666 thousand lei. The net profit achieved was in amount of 25.213 thousand lei.

We present the comparative evolution for the sales of products and services (thousand lei):

We present the markets where AEROSTAR business was performed during the first six months 2017 (as contribution in total sales)

INVESTMENTS

In the first six months 2017 the level of the investments made by AEROSTAR from own sources was in amount of 8.031 thousand lei.

From this amount, 7.397 thousand lei were spent for the acquisition of technological equipment, hardware, measurement and control units, installations, internal and freight transportation vehicles and equipment, etc while 634 thousand lei were spent for the acquisition of software licenses and for the development of the IT system applicable to the production management.

The digitalization is no longer an option, it is a MUST.

Aviation is certainly among the most advanced from the digitalization viewpoint.

The subcontractors management, the integration of all components are performed using highly digitalized business process for the very reason to provide for the traceability, transparency and integration of the processes.

The digitalization process initiated in AEROSTAR is not an option, it is a MUST.

The purpose of the digitalization is obviously to have an increased effectiveness of the data flow, to reduce the time to convey the information and use it when needed and not later.

The digitalization does not start from zero in AEROSTAR, there is already a range of digitalized processes, a sensors network installed on the equipment which join into an Internet of Things, there are already ERP systems, MRP, PDM.

Aerostar has the hardware and software resources required to continue this process, as well as the human resource to create the applications which are at the basis of the digitalization process.

The company is under full digitalization processes.

The main objective of the project team made of AEROSTAR specialists is the digitalization of all the production processes by the end of 2018.

QUALITY AND ENVIRONMENT

During the first six months 2017 AEROSTAR maintained the certifications and approvals issued either by the certification bodies, or by the customers or other regulatory authorities.

As regards quality, surveillance audits were performed in AEROSTAR both by the Romanian Civil Aeronautical Authority in order to maintain the Part 21G and Part 145 approvals, by the certification body AEROQ in order to maintain the certification in accordance with the requirements of SR EN ISO 9001, by DQS in order to maintain the certification in accordance with the requirements in AS9100, as well as by OMCAS in order to maintain the certification in accordance with the requirements in AQAP 2110.

As regards environment, four inspections were made by Garda de Mediu (environment police), an on site inspection by the Environment Protection Agency Bacau as a first step in the process to renew the approval, as well as the audit for the validation of the GES (greenhouse effect gas) certificates for the year 2016.

Also, the GES certificates were submitted in order to provide compliance with the applicable legislation.

During this period the water monitoring inspection was made for the entire company site in accordance with the requirements in the Integrated Environment Approval.

AEROSTAR AS AN EMPLOYER

In the first semester 2017 an actual number of 2128 employees were working in AEROSTAR, of which 185 were made available by AIRPRO CONSULT S.R.L., a company which operates on the market as a temporary labour agent.

AEROSTAR continued the professional development programmes for the employees by professional formation courses.

AEROSTAR provides training of its employees for specialties and skills which are not provided otherwise on the labour market.

During the first six months 2017 the total attendance in the professional formation programmes was 1879 as a number while the expenses for this activity were in amount of 523 thousand lei.

With reference to the background of the employees, the figures indicate as follows:

:

- university degree	566
- high school education	650
- vocational schools	646
- other categories	83

These figures do not include the numbers from the people employed through the temporary labour agent company and utilized in the production processes in AEROSTAR.

The average union membership was 76,15%.

The negotiations for a new collective labour contract were finalized on 22 March 2017 with validity in force from the date of 01 April 2017 until 31 March 2019.

RISK MANAGEMENT

AEROSTAR is exposed to a variety of risks and uncertainties which may affect its financial performances. The business lines followed by Aerostar, the operational results or the financial situation of the company, could be affected by the materialization of the risks presented as below.

Aerostar pursues to secure the mid and long term sustainability and also to reduce the uncertainty associated to its strategic and financial objectives.

The risk management processes provide the identification, review, assessment and administration of the risks in order to minimize their effects down to an agreed level.

Still, there may be risks and uncertainties further to the ones presented as follows, which are not currently known, or which are considered insignificant but which may affect in the future the business lines followed by Aerostar.

Operational Risk

It is the risk to register losses or not to achieve the estimated profits, caused by:

- use of inadequate processes, systems or human resources, or which did not conduct their function properly,
- external events and actions: degradation of the global economic conditions, natural catastrophies or other events which may affect Aerostar's assets.

Assimilated to the operational risk is the **Legal Risk**, defined as the risk of loss due to penalties, fines and sanctions for which Aerostar is liable in case of failure to apply or inadequate application of the dispositions, of the legal or contractual regulations, or in case the contractual rights and obligations are not properly set for Aerostar and/or its business partner.

The monitoring and the elimination of the effects of the legal risk is implemented by means of a permanent updating system as to the legislative changes, as well as through a system for the review, advise and approval of the terms and conditions included in the commercial agreements.

Aerostar allocates and will continue to allocate investment expenses and other operational expenses in order to prevent and manage the operational risk.

In addition, Aerostar seeks to have available company funds, by setting provisions for risks and related expenses, in order to cover its risks of exposure.

Also, in order to minimize the operational risk, Aerostar annually renews the liability insurance contract with prime insurance-reinsurance companies in connection with its main business lines (aviation products manufacturing and maintenance of commercial aircraft).

The **Credit Risk** is the risk of AEROSTAR bearing a financial loss as a result of the failure to meet the contractual business obligations by a customer, mainly determined by cash, cash equivalents (bank deposits) and commercial receivables.

The cash and cash equivalents are placed solely in first rank banking institutions and are considered to have a high solvency degree.

The credit risk, including the risk of the country where the customer performs its operations, is administered for each business partner. When considered necessary, specific mitigation tools are requested (advance payments, letters of bank guarantee, confirmed letters of credit).

AEROSTAR has no significant exposure towards a single partner and does not register a significant concentration of the turnover on a single geographic area.

A presentation of the quantitative information regarding AEROSTAR exposure to the credit risk is detailed in Note 9 (Financial Instruments) of the Financial Statements.

The **Liquidity Risk** is the risk for AEROSTAR to encounter difficulties in fulfilling its debt-related obligations as they become due.

For the administration of the liquidity risk, the treasury cash flows are monitored and reviewed weekly, monthly, quarterly and annually in order to establish the estimated level of net modifications of the cash. Such reviews provide the basis for the financing decisions and for the capital undertakings.

In order to reduce the liquidity risk, AEROSTAR keeps an annual cash reserve in the form of a Credit Line (used as overdraft) granted by banks.

During the reporting period, AEROSTAR did not use the contracted credit line in amount of 2.500.000 USD, all the activities being financed from company's own sources.

The **Market Risk** is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices.

The market risk includes the price risk, currency risk and interest rate risk.

AEROSTAR is mainly exposed to the price risk determined by the fluctuations of the price of raw materials and materials used in the production processes.

The management of this risk is made by:

- diversification of the range of suppliers, which provides increased negotiation levers in case of price increase for the materials from certain suppliers.
- Long term contracts, with fixed price clauses.

AEROSTAR is exposed to currency risk as 84% of the turnover is related to USD and EUR, while a considerable amount of the operational expenses is related to the operational currency (LEI).

So, the company is exposed to the risk of the exchange rate fluctuations, affecting both the net revenues and the financial position, as they are both expressed in LEI.

An analysis of AEROSTAR's sensitivity to the currency fluctuations is detailed in Note 9 (Financial Instruments) of the Financial Statements.

As far as the interest rate risk is concerned, due to the fact that AEROSTAR S.A. did not use the contracted Credit Line during the reporting period, the cash revenues and flows are independent from the interest rate variation on the banking market.

3. CHANGES IN COMPANY CAPITAL AND ADMINISTRATION

During the first six months 2017 AEROSTAR fulfilled all its financial obligations.

No changes occurred regarding the rights of AEROSTAR shareholders in the first half year 2017.

4. SIGNIFICANT TRANSACTIONS

In the first semester 2017, AEROSTAR did not conclude major transactions with the persons with whom is acting in correlation or transactions in which such persons were involved.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017

NOTE 1- GENERAL INFORMATION

AEROSTAR was established in 1953 and operates in accordance with the Romanian laws.

AEROSTAR S.A. operations take place at its registered headquarters located in Bacau, 9, Condorilor Street, Code 600302.

The main field of activity of AEROSTAR is production.

The main object of activity of the company is "Manufacture of aircraft and spaceships" - code 3030.

The company was registered as a shareholding company at the Trade Register of Bacau (under number J04/1137/1991), with the current name "AEROSTAR S.A." and the individual identification code 950531.

The record of its shares and shareholders is kept, as provided by law, by S.C. Depozitarul Central S.A. Bucharest.

During the first semester of 2017, no subscriptions of new shares and nor contribution certificates, convertible bonds, warrants, options or similar rights were recorded.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

NOTE 3 – ACCOUNTING POLICIES

The accounting policies represent the specific principles, bases, conventions, rules and practices applied in the preparation and presentation of the financial statements.

The company management has established the accounting policies for the operations performed, as described in the accounting policy manual.

These policies were prepared taking into consideration the specific features of the company activity and were approved by the Board of Directors of the company.

The accounting policies were prepared in compliance with the requirements of the International Financial Reporting Standards as approved by the European Union.

The accounting policies were developed in order to assure the provision through the financial statements, of information which shall be *intelligible*, *relevant* for users' needs in making decisions, *credible* in the sense of faithfully representing the assets, debts, financial position and profit, or the company loss, shall not contain significant errors, shall not be biased, shall be prudent, complete under all significant aspects, *comparable* so the users can compare the company's financial statements over time, to identify the tendencies in the financial position and its performance and to be able to compare the financial statements with the ones from the other companies in the evaluation of the financial position and the performance.

Modifications in the accounting policies

The modification of the accounting policies is only permitted if requested by IFRS or if it results in more relevant or more reliable information with reference to the company operations.

The company modifies an accounting policy only if such modification:

- Is required by an IFRS or
- Results in financial statements that provide reliable and more relevant information with reference to the effects of the transactions, of other events or conditions over the financial performance or cash flows of the entity.

How the modifications are applied in the accounting policies:

The entity takes into account a modification in the accounting policy that results from the initial implementation of an IFRS in accordance with the specific transitory provisions, if any, and when the entity modifies an accounting policy at the first time application of an IFRS that does not include specific transitory provisions.

The presentation of the information:

When the initial application of an IFRS has an effect over the current or previous period of time, the company presents, in explicative notes the following:

- the title of IFRS;
- the nature of accounting politic modification;
- when it is the case, the fact that the modification is made as an effect of the transitory dispositions and a description of these transitory provisions;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017

(unless specified otherwise, all amounts are stated in thousand lei)

- for the current period and for each period previously presented, the amount of the adjustments for each affected element from the situation of the financial position, to the extent possible.

When a voluntary modification of the accounting policy has an effect over the current or previously period, the company presents in the explicative notes:

- the nature of the modification of accounting policy;
- the reasons for which the application of the new accounting policy offers more reliable and relevant information;
- for the current period and for each period previously presented, the amount of the adjustments for each affected item from the financial position, to the extent possible.

General accounting policies

The general accounting policies which are the basis of accounts of the operations, transactions, the evaluation of the elements presented in the annual financial statements, as well as in the preparation of the financial statements are:

- The principle of continuity. The company continues its operations normally, without entering into liquidation or without reducing significantly its activity.
- The principle of consistency of methods. The evaluation methods and the accounting policies are applied consistently from one financial year to another.
- The principle of prudence, according to which the assets and revenues must not be overrated, while the liabilities and expenses must not be underrated.

The individual statement of the global result can only consider the profit obtained as on the date of the financial statements.

The financial statements reveal all the debts arising during the current financial year or of a previous financial year, even if they become apparent only between the date of the balance sheet and the date when the statement was prepared.

To this end, the possible provisions shall also be accounted, as well as the debts resulted from the contractual provisions. This is accounted in the balance sheet or in the explanatory notes according with the nature of such debt.

All the depreciations are accounted, no matter if the result of the period is profit or loss. The registration of the adjustments for depreciation or loss of value is made on the expenses account, regardless of their impact on the statement of the global result.

- The principle of independence
The revenues and expenses of the financial year are registered irrespective of the date when the revenues are earned or when the expenses are paid.

- The principle of accrual accounting

The company prepares the financial statements based on accrual accounting, except for the information on cash flows.

- The principle of separate evaluation of assets and liabilities elements, according to which the components of the assets and liabilities must be evaluated separately.
- The principle of non-compensation

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017

(unless specified otherwise, all amounts are stated in thousand lei)

The assets and liabilities, the revenues and expenses, respectively, are not compensated, except for the cases when the compensation is requested or allowed by a standard or by an interpretation thereof.

- The principle of prevailing economic aspects over the legal aspects, according to which when presenting the values in the balance sheet and in the profit and loss account, the economic basis of the reported transaction or operation is considered, not only the legal form thereof.

Materiality and Aggregation

Each significant class of similar elements is separately represented in the financial statements. The elements of different nature or functions are presented separately, except for the case when these are insignificant.

The information is significant if its omission or its misleading presentation can influence the economical decisions made by the users based on the financial statements.

To determine which information is significant, the following materiality thresholds are set, depending on the nature of the elements:

Element for which materiality threshold is set	Method of calculation	Value (%)
Immobilized Assets	Analysed asset/ Total Immobilized Assets	0,5%
Current Assets	Analysed Asset/ Total Current Assets	0,5%
Debts	Analysed debts/Total debts	0,25%
Revenues from Operations	Analysed income/ Total operating income	0,25%
Financial income	Analysed income/Total financial revenues	0,25%
Operating Expenses:		
-expenditure on inventories of materials	Analysed expense/Total inventories expense	0,25%
-expenditure with manpower	Analysed expense /Total expenditure with manpower	0,1%
-amortization expense	Analysed expense /Total amortization expense	0,5%
- other expenses	Analysed expense /Total other expenses	0,25%
Financial Expenses	Analysed expense /Total financial expenses	0,25%

Accounting policies on estimates and errors

Estimates

The preparation and presentation of the yearly individual financial statements, in accordance with IFRS suppose the use of estimates, judgements and assumptions affecting the application of the accounting policies as well as the reported value of assets, debts, revenues and expenses. Such estimates and judgments are made based on the historic experience, as well as on a series of factors considered adequate and reasonable. The reported accounting values of the assets and liabilities which cannot be determined or obtained from other sources are based on such estimates considered adequate by the company management.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The estimates, as well as the judgements and assumptions behind them are reviewed on a regular basis, and the result thereof is recognized during the time period when such estimate was reviewed.

Any modification of the accounting estimates will be recognized prospectively by including it in the result:

- Of the time period when the modification occurs, if it affects only the respective time period; or
- Of the period when the modification occurs and of the subsequent periods, if the modification also affects such periods.

The company uses estimates in order to determine:

- uncertain customers and adjustments for the depreciation of the related receivables;
- the value of the provisions for risks and expenses to set up at the end of a time period (month, quarter, year) for litigations, for the dismantling of tangible immobilizations, for restructuring, for warranties granted to customers, for obligations towards manpower and other obligations;
- the adjustments for the depreciation of tangible and intangible immobilizations.

At the end of each reporting period, the company must estimate whether there are any signs of depreciation. If any such signs are identified, the recoverable value of the asset is estimated in order to determine the extent of depreciation (if any). The recoverable value is the maximum between the fair value minus the sale expenses and the value during operation. When establishing the value in operation, the management estimates a future cash flow reduced to the current value, using a discount rate which reflects the current market value of the money value in time and the specific risks of the assets for which the cash flow estimates have not been adjusted.

- the lifetimes of the tangible and intangible immobilized assets;

The company reviews the estimated lifetime of the immobilized tangible and intangible assets at least at the end of each financial year, in order to establish the degree of adequacy.

- the inventories of raw materials and materials requiring the creation of adjustments for depreciation;
- deferred taxes.

Presentation of information

To the extent possible, the company will present the nature and value of a modification to an accounting estimate which has an effect in the current/subsequent period(s).

Errors

Errors can arise regarding the recognition, evaluation, presentation or description of the items in the financial statements.

The financial statements are not compliant with the IFRS standards if they contain either significant or insignificant errors made intentionally in order to obtain a certain presentation of the financial position of the financial performance or of the treasury cash flows of an entity.

The company shall retroactively correct the significant errors of the previous period from the first set of financial statements whose publication was approved after their discovery, through:

- restating the comparative amounts for the previously presented period in which the error occurred, or

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

- if the error occurred before the first previously presented period, restating the opening balances of assets, debts and company capitals for the previous presented period.

The company shall present the following information:

- the nature of the error for the previous period;
in so far as possible, for each of the previously presented period, the value of the correction;
~ for each row item affected from the financial statement;
~ for the basic result and diluted per share
- the amount of the correction at the beginning of the first period, previously presented;
- if the retroactive restating is impossible for a specific previous period, the circumstances which lead to the existence of such circumstance and a description of how and when such error was corrected.

Accounting policy on immobilizations

TANGIBLE IMMOBILIZATIONS

Recognition

The company recognizes the intangible immobilizations when:

- generating future economic benefits is probable for such asset
- The cost of the asset can be assessed in a reliably manner:

The tangible immobilizations are tangible assets which:

- are held to be used to produce or supply goods and services, to be rented to third parties or to be used for administrative purposes;
- are expected to be used over several periods of time.

The following are not capitalized: repairs and maintenance and general administration expenses. The specific recognition criteria for subsequent expenditures of the nature of the work performed at the property, plant and equipment from the construction area:

- The lifespan of the work performed shall be at least equal with the expected remaining useful life of the building in question.
- The cost of the work is over 25% of the accounting value of the building.

The spare parts and service equipment are generally accounted for as inventories and recognized as expenses when they are consumed.

If the spare parts and the service equipment can be used only in relation with a tangible immobilization element, they are accounted for tangible immobilizations, where it is possible to establish the initial purchase value (at commissioning) of the part being replaced.

In order to decide if the recognition is made separately, each case in particular is reviewed on separate components using the professional judgement.

The company management set an asset capitalization threshold of 2,500 lei. All purchases below this amount shall be considered expenses of the time period.

Exceptions: The computers are considered tangible immobilizations amortizable regardless of their entry value, and they shall be amortized throughout the useful lifetime established by the reception

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

board. Also, the tooling and jigs are accounted as inventories and recognized as expenses of the period when they are consumed, regardless of their entry value, taking into account that they usually have a useful lifetime of less than a year, as well as their degree of customization (they are intended to be used for a particular type of product/service).

Derecognition

The accounting value of a tangible immobilization element is derecognized:

- upon assignment
- when no more future economic benefits are expected from its use or disposal.

The revenue or loss resulted from derecognition of a tangible immobilization is included in the profit or loss when the immobilization is derecognized.

Evaluation at recognition

The costs at which a tangible immobilization is accounted comprise:

-the purchasing price, including customs taxes and non-reimbursable purchasing fees net of any discount and commercial deductions;

-the costs which can be attributed directly to bringing the assets to the location and condition needed to operate as desired by the company management;

- the initial estimate of the costs to dismantle and restore the site where it is located. For such costs to be accounted, the provisions set forth in IAS 37 "Provisions, contingent liabilities and contingent assets" apply.

IAS 2 "Inventories" is applicable to determine the costs to produce the tangible immobilizations under company's own administration.

The cost of a tangible immobilization held by the company based on a leasing agreement is determined in accordance with IAS 17 "Leases".

Assessment after recognition

The company has adopted the cost-based model as accounting policy. After the recognition as an asset, the tangible immobilizations are accounted for at their cost minus the aggregate amortization and any aggregate loss from depreciation.

Reclassification in investment property and immobilized assets held for sale

When the use of a tangible immobilization is modified from a tangible asset used in the production of goods or in the supply of services, or used in administrative purposes, into a tangible immobilization used to be rented, this is reclassified into an investment property, as per IAS 40. When the conditions are met for the classification of an asset as held for sale, such asset is reclassified in accordance with IFRS 5.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

Amortization of tangible immobilizations

The amortization is recognized in the profit and loss account using the linear method for the useful lifetime estimated for each tangible immobilization or component thereof, if applicable.

The amortizable value is allocated in a systematic manner throughout the useful lifetime of the asset.

The amortization methods, the useful lifetimes and the residual values are reviewed at least at the end of each financial year and adjusted accordingly. The adjustment of the accounting estimates is made in accordance with IAS 8 "Accounting policies, changes in accounting estimates and errors".

The amortization of an asset begins when the asset is available for use (i.e. when it is in the suitable location and condition to be functional as desired by the management) and ends when the asset is reclassified into another category, or on the date when the asset is derecognized.

The revaluation surplus included in the retained earnings resulting from using fair value as deemed cost at the date of transition to IFRS, is capitalized through the transfer in the retained earnings representing a surplus realised from revaluation reserves during the use of the assets.

The amortization does not cease when the asset is not in use.

The land and buildings are separable assets and their accounts are kept separately, even when they are acquired jointly.

Usually the land has unlimited lifetime and therefore it is not amortized.

For each reporting period, the company presents, in the explanatory notes the gross accounting value of the fully amortized tangible assets which are still in operation.

Depreciation

To determine whether a tangible immobilization element is depreciated, the company applies IAS 36 "Impairment of assets".

At the end of each reporting period the company estimates whether there are any indications of assets depreciation.

If such indications are identified, the company estimates the recoverable value of the asset.

INTANGIBLE IMMOBILIZATIONS

Recognition

The company makes use of professional judgment in the recognition of an intangible immobilization in order to decide if the most important component is the tangible or the intangible one.

The criteria for recognition of intangible immobilizations:

- the asset can be identifiable
- the company has control over the asset
- future economic benefits are associated to the asset
- the cost (value) of the asset is measurable in a reliable and trustworthy manner.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

Derecognition

An intangible immobilization is derecognized upon disposal or when no future economic benefits are estimated to occur from its use or disposal.

Evaluation at recognition

All intangible immobilizations which comply with the definition and recognition criteria are evaluated at their initial cost.

The cost is determined differently, depending on how the asset was obtained.

In case of purchase, the cost comprises:

- Its purchasing price, including import customs taxes and non-reimbursable purchase taxes, after deducting discounts and commercial deductions.
- Any other costs directly attributable to the preparation of that asset for use.

In case of intangible immobilizations internally generated such execution phases are clearly separated into:

- Research phase. The research costs are treated as expenses of the time period
- Development phase. The development costs are recognized as intangible asset, provided the following conditions are demonstrated:
 - Technical feasibility to complete the asset, so that it is available for use or sale;
 - Availability of adequate resources – technical, financial, human to complete the development;
 - Intention to complete and use or sell the intangible asset;
 - Capacity to use or sell the asset;
 - The manner in which the asset will generate future economic benefits;
 - Capacity to assess the related costs.

If the company cannot distinguish between the research and development phase of an internal project to set up an intangible immobilization, the company treats the project-related costs as if incurred exclusively in the research phase.

Items not capitalized by the company:

- internally generated trademarks
- publication titles
- lists of licenses (except as provided in IFRS 3)
- other similar elements.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

Evaluation after recognition

The company has adopted as accounting policy the cost-based model, which means that the intangible immobilizations are evaluated at their net accounting value equal with their cost less the aggregate amortization and any loss registered from depreciation, corresponding to those assets.

The subsequent expenses are capitalized only when they increase the value of the future economic benefits incorporated in the asset they are intended for. All the other expenses, including the expenses for the commercial fund and internally generated trademarks are recognized in the profit and loss account when they are incurred.

Amortization of intangible immobilizations

The company evaluates if the useful lifetime of an intangible immobilization is definite or indefinite.

An intangible immobilization is deemed by the company to have an indefinite useful lifetime when, based on the review of all relevant factors, there is no predictable limit of the period for which the asset is expected to generate net cash inputs.

The amortization of an intangible immobilization starts when such asset is available for use and ends when the asset is reclassified into another category or on the date when the asset is derecognized. The factors relevant for determining the useful lifetime are provided in IAS 38 "Intangible assets".

The intangible immobilizations with a limited useful lifetime are amortized by the company using the linear method, while the expense with the amortization is recognized in the profit or loss, except when it is included in the accounting value of another asset.

The intangible immobilizations with an indefinite lifetime are not submitted to amortization.

The useful lifetime of an intangible immobilization arising from contractual rights or from other legal rights must not exceed the validity period of the contractual rights or the other legal rights. The amortization methods, the useful lifetimes and the residual values are revised at the end of each financial year and adjusted accordingly.

The residual value of an intangible immobilization with a limited useful lifetime is evaluated as zero, except when:

- There is a commitment from a third party to purchase the immobilization at the end of its useful lifetime;
- There is an active lifetime for the immobilization and the residual value can be determined depending on the market likely to be available at the end of the useful lifetime of the immobilization.

Depreciation

In accordance with IAS 36, the intangible immobilizations with an indefinite lifetime must be tested yearly as to their depreciation, by comparing their recoverable value with their accounting value.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The testing shall be executed whenever there are indications that an intangible immobilization with an indefinite lifetime might be depreciated.

INVESTMENT PROPERTY

Recognition

An investment property is that property (land or a building – or a part thereof, or both) held (by the owner or lodger based on a financial leasing agreement) for renting purposes or for increasing the capital value or both, rather than for:

- use in production or for the supply of goods and services or in administrative purposes;
- sale in the normal course of activity.

An investment property must be recognized as an asset only and only when:

- it is possible that the future economic benefits related to the investment property are generated towards the company;
- the cost of the investment property can be assessed in a reliable manner.

Derecognition

The investment property must be derecognized upon assignment or when finally withheld from use and no more future economic benefits are likely to arise from such disposal.

The disposal of an investment property can be made by sale or by contracting a financial lease. To determine the date when the investment property was disposed of, the criteria of IAS 18 “Revenues” or IAS 17 “Leases” are applied.

Any earnings or losses generated by the write-off or assignment of an investment property must be recognized in the profit or loss at the time of withdrawal from use or assignment.

Classification

The category of investment property comprises:

- land held with a view to increase the capital value on long term;
- land held for an indefinite future use;
- a building owned by the company and rented based on an operational lease;
- property to be set up or refurbished for future use as an investment property.

Certain properties may include a part held for renting or with a view to increasing the capital value, and another part held for use in the production of goods, supply of services and for administrative purposes.

If these two parts can be sold separately (or rented separately), then they must have separate accounts – one as an investment property and the other as a tangible immobilization.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

If the parts cannot be sold or rented separately, then the property must be treated only as investment property if an insignificant part thereof is held for use in goods production or in the supply of services or for administrative purposes.

In this case the professional judgement is used for the appropriate decision.

When performing auxiliary services for the tenants of a real estate property, and if such services are an insignificant part of the entire contract, such property will be classified as an investment property.

If such services are a significant component of the entire contract, the property will not be classified as an investment property.

Evaluation upon recognition

An investment property must be assessed initially on cost, including any other expenses directly attributable. If the payment for an investment property is postponed, then its cost will be its price equivalent in cash. The difference between this amount and the total payments is recognized during the crediting period as expense bearing an interest.

Evaluation after recognition

After the initial recognition, the company has opted for the cost-based model for all its investment property in accordance with the dispositions of IAS 16 for this model.

The transfers into and from the investment property category are made if and only if there is a change of their use.

The transfers between categories do not change the accounting value of the transferred investment property, nor do they change the cost of that property in terms of evaluation or of the presentation of the information.

Amortization

The investment properties are amortized in accordance with the provisions set forth in IAS 16 "Property, Plant and Equipment".

ASSETS PURCHASED BASED ON LEASES

The leasing agreements by which the company substantially assumes the risks and benefits related to the ownership title are classified as financial leases.

At the time of the initial recognition, the asset subject to the lease is evaluated at the lesser of the fair value and the current value of the minimum lease payments.

Subsequently to the initial recognition, the asset is accounted for in accordance with the accounting policy applicable to the asset.

The other leases are classified as operational leases.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

FINANCIAL IMMOBILIZATIONS

The financial immobilizations account:

- Shares held in the affiliated companies, financial assets classified as investments retained till due date.
- Other immobilized securities.
- Long-term loans granted, as well as their related interest. This category comprises the amounts given to third parties based on contracts for which interest is charged in accordance with the applicable law.
- Other immobilized receivables, as well as their related interests. This category comprises the warranties, deposits and bails deposited at third parties, the receivables related to financial leases.

Evaluation upon recognition

The financial immobilizations recognized as assets are evaluated at the purchase cost or at the value established in their acquisition agreement.

Evaluation after recognition

The financial immobilizations are presented in the statement of financial position at their purchasing value minus possible loss recognized from depreciation.

Accounting policies on inventories

The inventories are assets:

- held for sale during the course of the regular activity
- in production for future sale
- materials and other consumables to be used in the production processes or for the supply of services.

The inventories are evaluated at the lesser of the cost and the net achievable value.

The net achievable value represents the sale price estimated for the inventories minus all estimated costs to complete and the costs necessary for sale.

The cost of the inventories comprises: the acquisition costs, the conversion costs as well as other costs incurred in order to bring the inventories in the condition and at the location where they currently are.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The acquisition costs of the inventories comprise the purchasing price, the import customs taxes and other taxes (except the taxes the entity can recover at a later time from the fiscal authorities), shipment costs, handling costs and other costs directly attributable to the acquisition of finished goods, materials and services.

The conversion costs include the direct labor costs, other direct production-related expenses, as well as the systematic allocation of indirect production expenses, fixed and variable overhead.

The allocation of overhead expenses on each product is based on the volume of labor used to make that product. The allocation of the fixed overhead on the costs is based on a normal production capacity, expressed in direct labor hours.

The calculation of such inventories which are not normally fungible and of the resulting goods or services is determined by the specific identification of their individual costs.

Upon release from the account of the inventories, and such fungible assets, are evaluated and accounted by applying the Average Weighted Cost method.

Borrowing Cost

The borrowing costs are recognized as financial expenses according to the contractual provisions during the period of time when such borrowing costs are due, or which actually occur and are not directly attributable to the acquisition.

The borrowing costs which are directly attributable to the acquisition, construction, or to the production of an asset with a long manufacturing cycle are included in the cost of that asset.

The production cost of long-manufacturing cycle assets includes only those borrowing costs connected with the production period.

The inventories category comprises:

- raw materials participating directly in the manufacture of products and found on the completed finished product in total or in part, either in their original form or transformed;
- consumables (auxiliary materials, fuels, packaging materials, spare parts and other consumables), participating or contributing to the manufacturing or in the operational process, typically not identifiable in the finished product;
- materials such as inventory objects;
- products, such as:
 - blanks/ forged items
 - finished products;
 - rejects, recoverable materials and waste;
 - merchandise;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

- packing, including reusable packaging material, purchased or manufactured, intended to be used on the sold products, and which can be kept temporarily by third parties and returned as established in the agreements;
- production in progress.
- goods in custody, for further processing or in consignment at third parties.

Distinct accounts are provided for purchased inventories, for which the risks and benefits have been transferred, but are still in the purchasing process.

The accounts of inventories are kept both in terms of quantity and value, by using the permanent inventory method.

Under these conditions, the accounts contain a record of all the entry and exit operations, thus allowing an accurate real time determination of the existing inventories, both in terms of quantity and value.

The company management approves the level of normal technological losses on a regular basis.

Evaluation upon recognition

The accounts of entries of inventories are based on the date of the transfer of risks and benefits.

Holding in any way of any material goods or the execution of any financial operations without recording them in the accounts is prohibited.

In terms of inventories, all entries of material goods in the company are submitted to the incoming reception by the reception board while the registration thereof is carried out in the stores areas.

The records in the stores are kept by the storekeeper in charge with the account.

The material goods received for processing, in custody or in consignment are received and registered distinctly as entries in the accounts.

In the accounts, the value of such goods is registered off the balance sheet.

In case of time gaps between the purchase and the incoming inspection of the goods which are in the company property, the following procedure is observed:

- the goods arrived without invoice are recorded as inflows in the inventory, both at the store and in the accounts, based on the receiving inspection and the accompanying documents.
- the goods arrived, and without receiving inspection are recorded as inventory inflows.

In case of time gaps between the sale and the delivery of the goods, the goods are recorded as outflows from the company, being no longer considered company property, and the following procedure is observed:

- the goods sold and not delivered are distinctly recorded in the company accounts, while in the company accounts they are registered as off-balance sheet, in the account 8039 – Other values off balance-sheet;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

- the goods delivered but not invoiced yet are recorded as outflows from the company inventory, both at the store and in the accounts, based on the documents confirming the outflow from the inventory.

- the goods purchased or sold with clauses as to the ownership title are recorded in accordance with the agreements concluded.

Evaluation after recognition

The inventories are evaluated at their purchase cost or production cost, as applicable. Every quarter value adjustments are made for the circulating assets, based on the findings of the Inventory committees and/or unit managers, with a view to presenting the assets at cost value or net achievable value, whichever is less.

In AEROSTAR, the depreciated goods are deemed to be the goods older than the storage period established by internal decision of the Board of Directors.

Accounting policies on the company liabilities

The company liabilities are recorded in the accounts as third-party accounts. The bookkeeping of the suppliers and other liabilities are kept on categories, as well as on each natural or legal person.

The tax on profit/revenue to pay is recognized as a debt up to the unpaid amount.

All excises and special funds included in prices or tariffs are recorded in the corresponding debt bookkeeping, without transit through the revenues and expenditure accounts.

The operations that cannot be recorded distinctly in the related accounts and which require further clarifications are recorded in a distinct account 473 (Settlements from operations under clarification)

Debts with settlement in currency

The debts in foreign currency are recorded in the accounts both in lei, and in foreign currency.

Regular evaluation

At the end of each month the debts in foreign currency are evaluated at the exchange rate on the currency market on the last banking day of that month, as notified by the National Bank of Romania. The variations in the exchange rate are recognized in the accounts as revenues or expenditure from the exchange rate differences, as applicable.

At the end of each month, the debts expressed in lei that are settled depending on a currency exchange rate are evaluated at the exchange rate on the currency market on the last banking day of that month, as notified by the National Bank of Romania.

The variations of the exchange rate are recognized in the accounts as financial revenues or expenses, as applicable.

The differences in the exchange rate arising at the time of clearing the debts in foreign currency at exchange rates differing from the ones used for recording such debts initially, during that month or

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

from the ones recorded in the accounts must be recognized in the same month when they arise, as revenues or expenses from changes in the exchange rate.

The differences in value arising at the time of clearing debts in lei, at an exchange rate differing from the exchange rate used for recording such debts initially, or during that month, or from the ones recorded in the accounts must be recognized in the same month when they arise, as other financial revenues or expenses.

Short-term debts

A debt shall be classified as short term debt, named also as current debt when:

- it is expected to be settled in the normal course of the exploitation cycle of the company, or
- it is chargeable within 12 months from the balance sheet date.

All the other debts shall be classified as long term debts.

Short-term liabilities

The debts that are due within a period exceeding 12 months are long-term debts.

They will also be considered long-term debts bearing interest even if they are due within 12 months from the date of the financial statements, if:

- a) the initial due date was longer than 12 months; and
- b) there is an agreement for refinancing or rescheduling the installments, concluded before the date of the financial statements.

The long-term liabilities comprise:

- Long- and mid-term bank loans,
- Commercial and similar debts, as well as the interests related thereto.

Certificates for greenhouse effect gas emissions

The company acknowledges the deficit of certificates for greenhouse effect gas emissions in the financial statements based on the net debt method. In accordance with this method, only the debts expected to arise from exceeding the assigned quota of certificates are recognized.

The company estimates its own yearly volumes of emissions at the end of each reporting period and recognizes the total additional debts estimated for the forecasted excess volume of greenhouse effect gas emissions at the fair value of the additional units to be purchased or the sanctions to be incurred in accordance with the national legislation. The net additional debt is recognized in the profit or loss based on the production unit method.

If the company estimates to use less than the assigned quota of certificates for greenhouse effect gas emissions, any potential revenue from the sale of unused certificates is recognized only upon the actual sale thereof.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

Receivables include:

- commercial receivables, which are amounts owed by the customers for goods sold and services supplied in the normal course of activity;
- commercial effects to receive, as instruments from third parties;
- amounts owed by the employees or affiliated companies;
- advances given to the suppliers of immobilizations, goods and services;
- receivables related to manpower and state budget

The receivables are registered based on accrual accounting in accordance with law or subject to the agreements in place.

The receivables account provides the record of company receivables in relation to customers, manpower, social security, state budget, shareholders and various payers.

The customer accounts are kept on categories (internal customers for services and products, as well as external customers for services and customers) and on each natural and legal person.

Any debts resulting from treasury advances not settled, from distributions of work outfits, as well as the debts from material damages, fines and penalties established by Court orders and other receivables related to manpower are recorded as other receivables related to manpower.

The operations that cannot be recorded distinctly in the related accounts and requiring further clarifications are recorded temporarily in a distinct account (account 473). The amounts recorded in this account are clarified within three months from the date when they are found.

Receivables cleared in foreign currency or in Lei, depending on the currency exchange rate

The receivables and debts in foreign currency resulted as an effect of the company transactions are recorded in the bookkeeping both in Lei, and in foreign currency.

The transactions in foreign currency are recorded initially at the exchange rate notified by the National Bank of Romania, on the date of performing the operation.

At the end of each period, the receivables in foreign currency are evaluated at the exchange rate on the currency market on the last banking day of that month, as notified by the National Bank of Romania. The exchange rate differences are recognized in the accounts as revenues or expenses from exchange rate differences, as applicable.

At the end of each period, the receivables expressed in lei, which are cleared depending on the exchange rate of a certain currency are evaluated at the exchange rate of the currency market, as notified by the National Bank of Romania for the last banking day of the month. In this case, the differences that arise are recognized in the accounts as financial revenues or expenses, as applicable.

The differences in the exchange rate that arise at the time of settlement of the receivables in foreign currency at exchange rates differing from the ones used for those initially recorded in the bookkeeping must be recognized in the same month when they arise, as revenues or expenses from differences in the exchange rate.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The receivables with prescribed past due dates are deducted from the accounts only after all legal steps have been made for their settlement.

The accounting of uncertain receivables is kept directly in the account 4118 – Uncertain customers or customers in dispute at law.

In the yearly financial statements the receivables are evaluated and presented at the value likely to be received.

Whenever it is estimated that a receivable is not to be fully received, adjustments for depreciation are recorded at the level of the amount which can no longer be recovered.

The evaluation in the financial statements of the receivables expressed in foreign currency and of the receivables to be cleared in lei against the exchange rate of a certain currency notified by the National Bank of Romania, as valid on the date when the financial year ends.

Accounting policies of the currency, cash equivalents and their presentation in cash-flow statements

Cash comprises cash on hand and at banks;

Cash equivalents shall include:

- Short-term bank deposits, which are known amounts of cash and which are subject to an insignificant risk of changes in value.
- Cheques, commercial effects received from clients and lodged upon maturity in bank in order to collect their c/value
- Collateral deposits set at third parties;

Treasury cash flows represent the cash in- and out-flows and cash equivalent, classified on operating, investment and financing activities.

Accounting of cash and cash equivalents and their movement, as a result of amounts collected and payments realised, shall be kept in lei and foreign currency.

Operations related to amounts received and paid in foreign currency are registered in accounting at the foreign exchange rate communicated by the National Bank of Romania, valid on the date of carrying out the operations, except the buying and selling of foreign currency operations which shall be registered in accounts at the time of settlement of the operation and at the rate exchange negotiated with the commercial bank under a contract of currency sale-purchase.

At the end of each reporting period the cash and cash equivalents expressed in foreign currency shall be reassessed at the foreign exchange rates communicated by the National Bank of Romania and valid from the last banking day of the month in question, the favourable or unfavourable rate differences recorded being recognised in accounting at the incomes from the favourable rates, respectively at the expense from the unfavourable rates differences.

The treasury cash flows are reported by using the direct method through which the major classes of gross amounts collected and paid in cash arising from operational, investing and financing activities.

The treasury cash flows arising from taxes paid on income are classified as treasury cash flows from operating activities.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The treasury cash flows arising from interest and dividends are classified as cash flows from investment activities.

The treasury cash flows arising from interest and dividends paid are classified as cash flows and financing activities.

The effect of changes in foreign exchange rates on cash and cash equivalents is presented in treasury cash flows which is separately from the cash flows arising from the operational, investments and financing activities with a view to reconcile cash and cash equivalents at the beginning and at the end of the reporting period.

Transactions which do not require the use of cash or cash equivalents are included in treasury cash flows statement, but the relevant information regarding these transactions will be presented in another part of financial statements.

Accounting policies on the recognition of expenses

All expenses are recognized in the statement of the global result of the company when it is possible to evaluate in a reliable manner a reduction of the future economic benefits connected to a decrease of an asset or to a debt increase. As a result, the recognition of the expenses takes place at the same time as the recognition of the debt increase and the decrease of the assets.

The company's expenses are the amounts paid or payable for:

- Consumptions of inventories;
- work performed and services supplied for the benefit of the company;
- expenses for employee benefits;
- execution of legal or contractual obligations;
- provisions;
- amortizations;
- adjustments for depreciation or loss of value.

The accounts of the expenses is kept by types of expenses, as follows:

- operational expenses;
- financial expenses;
- extraordinary expenses, including only losses from calamities and other extraordinary events.

The operational expenses comprise:

- expenses with raw materials and consumables, the purchase costs of materials which are not inventories, the counter value of used utilities, the cost of sold goods;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

- expenses with manpower– employee benefits (salaries, insurance and social security and other manpower-related expenses in charge of the company: expenses with training, meal tickets and social expenses);

- expenses with: services executed by third parties, insurance premiums, rents, protocol, advertising and publicity, transportation of goods and personnel, reassignments of personnel, bank services, mail and telecommunications, etc.;

- other operational expenses: losses from receivables and various debtors, fines and penalties, etc.

Employee Benefits

The employee benefits are various counter-services granted by the company in exchange for the service performed by the employees.

During its normal course of activity, the company pays to the Romanian state, on behalf of its employees, the contributions for pensions, health insurance and unemployment. The expenses with these payments are recorded in the profit or loss during the same period of time when the related salary expenses were made.

All the company employees are members of the Romanian state pension plan.

In SC AEROSTAR SA the following categories of employee benefits are recognized:

- short-term benefits such as salaries and contributions to social security, paid yearly vacation and paid medical leave and bonuses (if paid within 12 months from the end of the period), meal tickets and other benefits provided in the collective labour agreement.

- post-employment benefit, for example retirement related benefits

- benefits for termination of the labor agreement

Benefits for termination of the labour agreement

The benefits for termination of the labor agreement are negotiated periodically, as provided in the collective labour agreement.

The financial expenses are:

- expenses related to financial investments assigned;

- unfavourable changes in the currency exchange rates;

- interest-related expenses;

- other financial expenses.

The financial expenses comprise the expense with the interest related to loans, the loss from recognized depreciation related to financial assets.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

All the borrowing costs not directly attributable to the purchase, construction or the production of assets with long manufacturing cycles are recognized in the profit or loss account, by using the actual interest method.

In the preparation of the financial statements, the transactions in other currencies than the currency of the company operations are recognized at the exchange rates on the dates of the corresponding transactions.

At the end of each reporting period, the elements expressed in foreign currencies are converted into the exchange rates applicable on that day.

The revenues or losses from changes in the exchange rates are reported on a net basis.

The synthetic expenses accounts are developed on the structure of analytical accounts, according to the accounting regulations in force (the general plan of accounts) and depending on the company's own needs, subject to the management approval.

The expenses of the financial year also comprise the provisions, amortizations and adjustments for the depreciation or the loss of value, the expenses with tax on the current and deferred profit and other taxes, calculated according to the law, which are kept distinctly, according to their nature.

Accounting policies on the recognition of revenues

The revenues are recognized in the statement of the global result of the company when it is possible to evaluate in a reliable manner an increase of the future economic benefits related to an asset increase or a debt decrease. Consequently, the revenues are recognized at the same time as the recognition of the asset increase or debt decrease.

The revenues also include both the amounts received or to be received as such and the revenues from any other source.

The revenues are classified as follows:

- Revenues from operations;
- Financial revenues;
- Extraordinary revenues.

Revenues are recognized based on accrual accounting.

The synthetic revenue accounts are developed on the structure of the analytical accounts, according to the accounting regulations in force (the general plan of accounts) and depending on the company's own needs, subject to the management approval.

The revenues are evaluated at the fair value of the counter value received or likely to be received. The sales revenues are decreased in case of returns, discounts and other similar discounts.

Operating income include:

- revenues from sales (of goods, of services, of goods, of waste products);
- revenues related to the cost of inventories of products;
- revenues from the production of immobilizations;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

- revenues from the adjustments for assets resumed, or from reductions of provisions or from provisions resumed
- other operating income.

Sales of goods

The revenues from the sale of goods are recognized when all of the following conditions are met:

- the company transferred to the buyer the risks and benefits related to the ownership title for the goods;
- the company keeps neither the continued managerial involvement down to the level usually associated to the ownership title, nor the effective control over the goods sold;
- the value of the revenue can be accurately evaluated;
- the economic benefits related to the transaction are likely to be directed to the entity;
- the costs incurred or to be incurred in relation to the transaction can be measured precisely.

In particular, the revenues obtained from the sales of goods are recognized when the goods are delivered and the legal title is transferred.

Supply of services

The revenues from the supply of services are recognized in the profit or loss account proportionally with the status of execution of the transactions, as on the report date. The execution status is assessed in relation to the review of the work carried out. In case the result cannot be estimated, the revenues are recognized down to the level of the recoverable costs.

Revenues from rent

The revenues from rent related to the investment property are recognized in the profit or loss account in a linear way throughout the rental agreement.

The financial revenues comprise revenues from interest and revenues from dividends.

The revenues from interest are recognized in the profit and loss account based on accrual accounting, using the actual interest method. The revenue from interest generated by a financial asset is recognized when the company is likely to obtain economic benefits and when such revenue can be measured precisely.

The revenues from dividends generated by investments are recognized when the shareholder's right to receive the payment is established (provided that the economic benefits are likely to be directed towards the Group and the value of the revenues can be measured precisely). The company records the revenues from dividends at their gross value which includes the tax on dividends (when applicable), which is recognized as current expense with the profit tax.

Accounting policies regarding trade and financial discounts

Trade discounts are:

- a) discounts received for quality defects and are practiced as to the sale price

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

b) volume discounts received in case of the sales volumes higher than agreed if the buyer has a preferential status, and

c) discounts as price reductions calculated in the frame of the overall transactions with the same third party, during a specified period.

The financial reductions are under the form of settlement discounts of settlement for the debts paid off before the normal due term.

Recognition:

Commercial reductions granted by the supplier and entered on the purchase invoice are adjusted in the sense of reducing the acquisition cost of the goods.

Commercial discounts received after invoicing corrects the cost of the inventories to which they refer, if these are still in store. If the inventories for which subsequent discounts were received are no longer in store, these shall be kept in accounts (account 609 "Trade discounts received"), on account of third parties accounts.

Commercial discounts granted after invoicing, no matter the period to which they refer, are kept in accounts (account 709 "Trade discounts granted"), on account of third parties accounts.

Accounting policies on provisions

Provisions

The provisions are recognized when the company has a current obligation (legal or implied) as a result of a past event, it is likely that the company is requested to pay such obligation and a precise estimate of the obligation can be made.

The amount recognized as a provision is the best estimate of the countervalue needed to settle the actual obligation at the end of the reporting period, taking into account the risks and uncertainties around this obligation.

Provisions are accounted on types, depending on the nature of the function, the purpose thereof or the scope they were set up for.

Warranty Accounting

The company sets up the warranty provision when the product or service covered by the warranty is sold.

The value of the provision is based on historical or contractual information about the warranty granted and is estimated by weighing all possible results against the probability of each to occur.

Provisions for risks and expenses

When risks and expenses are identified which the events occurred or in progress make them probable, and whose object is precisely determined, but uncertain as to their occurrence, the company covers such risks by setting up provisions.

The provisions for risks and expenses are set up for elements such as:

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

- litigations, fines, penalties, compensations, damages and other uncertain debts.
- other actual obligations, whether legal or implicit.

Provisions for decommissioning of tangible immobilizations

Upon the initial recognition of a tangible immobilization, an estimate is made for the value of the disassembly costs, the costs for the item removal and restore the site where it was located, as a consequence of using the item for a certain period of time.

Provisions for the benefits of the employees

Are recognised in case of bonuses (financial year-end bonuses, production year-end, performance etc.) granted in accordance with the applicable collective labour agreement, if and only if:

- the entity has a legal and implicate obligation to make this kind of payments as a result of past events, and
- a reliable estimate of the obligation can be realised.

The provisions are reviewed at the end of each reporting period and are adjusted in order to reflect the best current estimation.

Accounting politics regarding debts and contingent assets

According to IAS 37, the company does not recognise assets and contingent debts, they are kept in off balance accounts.

A contingent asset is a possible asset, resulted following a past event and whose existence will be confirmed only by the occurrence or failure to occur of several future uncertain events, which are not totally under the control of the entity.

A contingent debt represents:

a possible obligation resulted from past events and whose existence will be confirmed only by the by the occurrence or failure to occur of several future uncertain events, which are not totally under the control of the entity;

a present obligation resulted from past events, but which is not recognized as it is unlikely to need resources incorporating economic benefits going out, or the value of the obligation cannot be sufficiently reliably assessed;

Accounting policies on profit taxation

The profit taxation expenses represent the aggregate amount of taxes to be paid currently, as well as the deferred taxes.

Current tax

The currently payable tax is based on the taxable profit made throughout the year. The accounting profit differs from the profit reported in the annual statement on the profit tax because of the elements of revenues or expenses which are taxable or deductible in certain years, as well as the elements which are never taxable or deductible.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The company's obligation in terms of current taxes is calculated by means of the tax rates adopted at the end of the reporting period.

Deferred tax

The deferred tax is recognized based on the temporary differences between the accounting value of the goods and of the debts from the related financial statements and the taxation bases used for calculating the taxable profit. The deferred tax debts are recognized in general for all the temporary taxable differences.

The asset regarding the deferred tax is recognized in general for all the temporary deductible differences up to the time when such taxable revenues, to which deductibility was applied, can be used.

The accounting value of the assets, to which the deferred tax is applied, is reviewed at the end of each reporting period and limited to the point from where it is no longer expected to have enough taxable profits to allow the total or partial recovery of the assets.

The assets and the debts related to the deferred taxes are measured at the level of the taxes proposed to be applied during the period of time established for recovery of the debt or to make the asset, based on the level of taxes (and fiscal laws) already in force or about to enter in force by the end of the reporting period. The measurement of the deferred tax debts and assets mirrors the tax-related consequences likely to result from the way in which the company anticipates, at the end of the reporting period, to recover or settle up the accounting value of its assets and debts.

Both the current tax and the deferred tax are recognized in the profit and loss account, except when they refer to elements recognized directly in the company's own capital, when the current tax and deferred tax are also recognized directly in the company's own capital.

Accounting politics on the distribution of the profit

The profit or the loss shall be established cumulatively from the beginning of the financial year.

The final result of the financial period shall be established at its closure and represents the final account of the profit and the loss determined like the difference between the incomes and expenses for the year.

Profit distribution on destinations is registered in such accounts after the approval of the annual financial statements.

Reserves

At the end of the reporting period, legal reserves are set on account of the profit of the period, only on the basis of the applicable legal provisions.

The accounting profit which remained undistributed shall be resumed at the beginning of the financial period following the one for which annual financial statements are prepared in the account for result carried forward, from it is to be distributed on the other destinations decided by the General Meeting of Shareholders, in compliance with the legal provisions.

The closing of the accounts "Profit or Loss" and "profit distribution" is performed in the financial year following the one for which the annual financial statements are prepared.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

Profit distributions on the other destinations

The record on accounts for the distribution on destinations of the accounting profit, except the legal reserve, is performed in the following financial year, according to the General Meeting of Shareholders.

The profit can be distributed for:

- cover the accounting loss carried forward;
- dividends distribution;
- other statutory reserves.

Covering the accounting loss

The accounting loss carried forward is covered from the financial year profit and the one carried forward, from reserves, capital bonuses and share capital, according to the Decision of the General Meeting of Shareholders.

In case of correcting the errors which generate loss carried forward, this is covered covered before making any profit distributions.

In the situation in which the development expenditure is not entirely amortised, no profit distribution shall be made, only if the amount of the distributable reserves and of the profit carried forward is at least equal to the one of the development expenditure not amortized.

Accounting policies on establishing the result per share

The company provides information on the result per basic share. Such result per basic share is calculated by dividing the profit or loss attributable to the holders of ordinary shares of the company at the weighted average of the ordinary shares circulating during that period of time.

Accounting policies on subsidies and other non-reimbursable funds

The category of subsidies distinctly comprises:

- government subsidies;
- non-reimbursable loans of a subsidy nature;
- other amounts received as subsidies.

Recognition

The subsidies are recognized at their approved value.

The subsidies received as non-monetary assets are recognized at fair value.

The government subsidies are initially recognized as deferred revenue at the fair value when there is a reasonable assurance that such revenue will be collected and the company will comply with the terms associated to the subsidy.

The subsidies compensating the company for the expenses made are recognized in the profit and loss account in a systematic manner, during the same timeperiod when the expenses are

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

recognized. The subsidies compensating the company for the cost of an asset are recognized in the profit and loss account in a systematic manner throughout the lifetime of the asset.

Subsidies for investments

The subsidies for assets, including the non-monetary subsidies at fair value are accounted as subsidies for investments and are recognized in the balance sheet as deferred revenue.

The deferred revenue is accounted in the profit and loss account at the same time when the expenses with the amortizations or with the write-off or assignment of the assets are accounted.

The return of a subsidy related to an asset is registered by decreasing the balance of the deferred revenue with the reimbursable amount.

Subsidies related to revenues

The revenues-related subsidies are recognized in a systematic manner as revenues of the time periods corresponding to the related expenses, which such subsidies are about to compensate.

In case during a time period subsidies are received on the account of expenses which were not made yet, the subsidies received do not represent revenues of the respective current period. These are recognized in the accounts as advance revenues and are resumed in the profit and loss account while such expenses are being made in their compensation.

The return of a subsidy related to revenues is made by reducing the deferred revenues.

If the reimbursed amount exceeds the deferred revenue or if there is no such revenue, the surplus, i.e. the reimbursed integral value, is recognized immediately as an expense.

Accounting policies for Related Parties

A transaction with the related parties represent a transfer of resources, services or obligations between the reporting company and a related party, whether a price is levied or not.

The identification criteria of the Company related parties are according to IAS 24 "Related Parties Disclosure".

Disclosure of information

Relations between the Company and its related parties will be presented whether there have been transactions between them or not.

The company shall present the name of the mother-company which draws up the consolidated financial statements available for public use.

If the Company had transactions with the related parties along the period covered by the financial statements, such party will present the nature of the relation with the related parties, as well as the information regarding those transactions.

The presentation of the information will at least include:

- the value of the transactions
- the value of the outstanding balances, including the undertakings;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017

(unless specified otherwise, all amounts are stated in thousand lei)

- provisions for questionable receivables related to outstanding balance;
- the expense recognized during the period regarding the non-recoverable or questionable receivables owed by the related parties.

The presentations of information will be separately made for each of the next categories:

- mother-company;
- affiliated companies;
- subsidiaries;
- fellow subsidiaries in which the entity is an associate;
- members of key management personnel of the company or mother company, and
- other affiliated parts.

Accounting policies on the production of goods and services

The organising of the collecting accounts of SC AEROSTAR SA is based on applicable legal provisions and the procedures and working instructions manual specific of management accounts, adapted to the specific of the company's activity.

Chart of accounts

AEROSTAR uses, for management accounting, accounts from class 9 of the general Accounts Plan contained in accounting regulations conforming to the Order of the public finances minister 2844/12/12/2016 developed in analytical accounts.

The object of management accounting consists of:
collecting of direct, indirect and auxiliary costs in accordance with their nature
allocation of indirect costs
settlement of direct and indirect costs.

The main purpose of management accounting is:

- determine the unfinished production
- determine the result on production orders or other services and on each organisational structure unit.

According to the accounting regulations, the following elements which are admitted as expenses for the period in which they were made are not included in the cost of the goods, works, or executed services:

- a) losses of materials, manhours or other production costs which exceed the normal limits admitted
- b) general administrations expenses.

The calculation method used in SC.AEROSTAR S.A Bacau is the method on Orders.

This method is indicated for individual and series production. In this method the object of evidence and of cost calculation consists in the order launched for a certain quantity (batch) of products.

The production expenses are collected directly on each order (those with a direct character) or by allocation (the indirect ones).

The effective cost per product unit shall be calculated at the completion of the order by dividing the collected production costs on the associated order for the quantity of the manufactured products within the order in question.

The launching of the orders shall be made at the sale price or at the planned price, as applicable.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

In case of orders related to export sales the price shall be expressed in lei by changing the currency at the budgeted exchange rate.

STEPS TO DETERMINE THE COSTS ON ORDERS

Prepare the provisional calculation of costs on orders;
Collection of direct expenses on orders;
Collection of indirect expenses;
Allocation of indirect expenses and settlement of the costs for the orders related to the auxiliary activities;
Settlement of the costs of the direct orders on indirect expenses;

Allocation of the indirect expenses related to the basic activity;
Settlement of the production cost and get the goods production and subunitary production
Determine the production in progress.

Accounting policies for events after the reporting date

The events following the reporting period are those specific events, favourable or unfavourable, which occur between the end of the reporting period and the date to which the financial statements are authorised to be issued.

The company adjusts the values recognized in its financial statements to reflect the subsequent events which lead to the adjustment of the financial statements after the reporting period, according to IAS 10 provisions.

Presentation of the information

The Company presents the date when the financial statements were approved for release, as well as who gave this approval.

If after the reporting period the Company receives information on the conditions which existed at the end of the reporting period, the Company updates the presented information which refers to such conditions, in the context of the new information.

If the events, which do not lead to the adjustment of the financial statements after the reporting period, are significant, the Company presents the following information for each category for such events: the nature of the event and an estimation of the financial effect or a declaration according to which this kind of estimation cannot be made.

Accounting policies on financial instruments

A financial instrument is a contract generating simultaneously:

- a financial asset for an entity
- a financial debt or a company capital instrument for another entity.

The company will recognize an asset or a financial debt in its financial statements if and only if the company becomes part of the contractual provisions of the respective instrument.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

A standard purchase or sale of financial assets will be recognized and derecognized, as applicable, using the method of accounts on the date of concluding the transaction or on the date of its settlement.

All the financial assets and liabilities are recognized initially at fair value plus, in case of a financial asset or of a financial liability which is not assessed at fair value in its profit and loss account, the transaction costs directly assignable to the acquisition or to the issue of the asset or of the financial liability. The securities without transactions are evaluated at their historic cost, minus any possible adjustments for loss of value.

The company compensates a financial asset with a financial liability if and only if:

- it has the legal right to proceed as such, and
- it intends to settle it on a net basis, or
- to make the asset and to pay off the debt simultaneously.

A financial asset is depreciated when its accounting value is higher than its estimated recoverable value.

On the date of each balance sheet the company determines the existence of any depreciation indications.

The accounting value of the asset must be reduced down to the level of the estimated recoverable value and the loss will be included in the profit and loss account for the respective time period.

The loss from depreciation is the difference between the accounting value and the updated value of the estimated future cash flows.

In the application of its accounting policies, the company issues procedures, instructions and work dispositions.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

NET ACCOUNTING VALUE OF TANGIBLE IMMOBILIZATIONS on 30 June 2017

	<u>Gross value</u>	<u>Amortization</u>	<u>Adjustments for loss of value</u>	<u>Net accounting value</u>
1. Land	28.346	-	-	28.346
2. Constructions	52.529	9.686	-	42.843
3. Technical equipment and transport vehicles	111.348	43.897	-	67.451
4. Other tangible immobilizations	890	284	-	
5. Real estate investments	7.860	1.596	-	6.264
6. Tangible immobilizations in progress	3.254	-	-	3.254
Total (1+2+3+4+5+6)	204.227	55.463	-	148.764

The tangible immobilizations are grouped by the company in the following classes of assets of the same nature and similar uses:

- Land;
- Constructions;
- Technical equipment (plant, machinery, installations);
- Means of transport;
- Other tangible immobilizations;
- Property investments.

When determining the gross accounting value of the tangible immobilizations, the company used the historical cost method.

The tangible immobilizations are amortized by the company using the linear method throughout the estimated useful life, as follows:

- constructions 30-50 years
- technological equipment 4-25 years
- means of transport 4-18 years
- other tangible immobilizations 2-18 years
- property investments 25-50 years

The useful lifetimes are established by committees of specialists from the company.

The fiscal operational durations of the tangible immobilizations are stipulated by the fiscal legislation on assets.

The useful lifetimes of the tangible immobilizations will be reviewed and will be valid starting with 01 September 2017.

The company did not purchase assets from business combinations, nor did it classify assets for future sale.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

As on the date of transition to IFRS, the company estimated and included in the cost of tangible immobilizations the estimated costs for dismantling and relocating the assets, as well as costs for site restoration at the end of the useful lifetime.

These costs were reflected in the set-up of a provision, which is recorded in the profit and loss account throughout the lifetime of the tangible immobilizations, by inclusion in the amortization expense.

The revision of the estimates for the decommissioning and restoration provision is determined by the annual revision of the dismantling costs. The company's board of specialists designated to review yearly any changes to the estimates analyzed at the end of the financial year 2017 if the initial estimates of the dismantling costs were adequate.

The amortization expenses are recognized in the profit and loss account by using the linear method of calculation.

The amortization of an asset begins when the asset is available for use (i.e. when the asset is in the location and condition necessary to operate as wanted by the management) and ends on the day when the asset is reclassified in another category or when it is derecognized.

The amortization does not end when the asset is not in use.

The land and buildings are separable assets, and their accounts are kept separately, even when they are acquired together.

The land has an unlimited useful lifetime and, therefore, is not submitted to amortization.

In accordance with the provisions of IAS 36-Depreciation of assets, the company proceeded to the identification of any signs of asset depreciation, using internal sources.

Din analiza surseilor s-a constatat ca:

- the economic performance of the assets is good, compared to the forecasted performance, all the immobilizations in operation bring benefits to the company
- in first half 2017 no changes occurred with adverse effects on the extent and manner in which the assets are used, nor such modifications are expected in the near future.

To conclude, the tangible immobilizations in the balance sheet account on 30.06.2017 are not depreciated, and no adjustments were made for the depreciation thereof.

The gross accounting value of the fully amortized tangible immobilizations which were still in operation on 30 June 2017 is 2.322 thousand lei.

As on 30.06.2017 no mortgages were set on tangible real estate assets in the property of AEROSTAR S.A.

In February 2017, a building of which the gross accountant value is 112 thousand lei, was transferred from *Investment property* category into the *Tangible assets* category, as a result of the amendment of use by AEROSTAR.

Increases in gross values of the tangible immobilizations, achieved by:	<u>12.843</u>
• acquisition of technical equipment, hardware equipment, equipment for internal transportation, for measuring and control, modernization of buildings, etc	5.426
• capitalization of expenses related to investments in progress, financed entirely by AEROSTAR	7.398
• immobilizations found as surplus in the inventory	19

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

Decreases in gross values of tangible immobilizations, achieved by:	<u>5.492</u>
• completion of investments in progress	5.426
• derecognition of certain tangible immobilizations, due to the fact that the company no longer expects future economic benefits from their use.	66

Total (1+2+3)	5.020	3.272	-	1.748

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

In the intangible immobilizations category the following classes of assets of similar nature and use are included:

- Development expenses
- Licences
- Other intangible immobilizations

The IT programmes are accounted as part of the other intangible immobilizations.

The estimated useful lifetimes of intangible immobilizations are established in years. The useful lifetimes are established by committees of specialists from the company.

The fiscal durations of operation of the intangible immobilizations are stipulated by the fiscal legislation on assets.

The expenses with amortization are recognized in the profit or loss account using the linear method of calculation.

The intangible immobilizations in the balance sheet account as on 30.06.2017 are not depreciated and no adjustments were made for the depreciation thereof.

When determining the gross accounting value of the intangible immobilizations, the company uses the historical cost method.

The value of the completely amortized software licenses on 30 June 2017 and which are still in use is 847 thousand lei.

All the intangible immobilizations recorded in the balance sheet account as on 30 iunie 2017 are the property of AEROSTAR.

Increases in gross values of intangible immobilizations were obtained by:	<u>647</u>
• capitalization of the development expenses fully financed by Aerostar qualification of special processes	13
• development of informatical system of AEROPROD production management	479
• acquisition of software licenses	155

In the first semester of 2017 no entries of licences internally generated or achieved through business combinations.

In the first semester of 2017 no assets were classified as held for sale in accordance with IFRS 5.

NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

The contribution of AEROSTAR in these companies is recorded based on cost.

In the first semester of 2017, the company recorded no modifications i.e. no increases/decreases as to the stake-holding percentage, maintaining the same influence as in 2016.

All companies in which AEROSTAR holds shares are registered in Romania.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017
(unless specified otherwise, all amounts are stated in thousand lei)

NOTE 7- TAX ON PROFIT

The profit tax corresponding to the reported time period comprises the current tax and the deferred tax. The profit tax is recognized in the statement of the profit or loss, or directly in the company capitals if the tax relates to the capital items.

Current tax on profit

The current tax is the tax payable in relation to the profit achieved in the current period, as determined based on the applicable fiscal regulations at the reporting date. Starting with 01.01.2017 Aerostar S.A. is paying taxes applicable to the restaurant and food service. Therefore, the current tax related to other activities and the specific tax were determined separately – which has the payment deadline of 25.07.2017. The tax rate on profit applicable for 30.06.2017 was 16% (the same rate was applied in the financial year 2016).

	31 June
	<u>2017</u>
Gross accounting profit	31.306
Expenses with current tax on profit	5.278

Reconciliation of accounting profit with fiscal profit				Differences
Accounting revenues*	184.311	Fiscal revenues	164.987	-19.324
Accounting expenses*	152.995	Fiscal expenses	128.546	-24.449
Gross accounting profit*	31.316	Fiscal profit	36.441	+5.125
Tax (16%)	5.011	Fiscal tax (16%)	5.831	+820
Tax reductions	-		553	+553
Tax on final profit	5.011		5.278	+267
Applicable statutory rate	16%			
Actual average tax rate, calculated on gross accounting profit	16,85%			

*The incomes and expenses are the ones obtained after the deduction from total incomes respectively total expenses of the incomes and expenditure relating to the activities subject to the specific tax.

The main factors which affected the rate of taxation were:

- Non-taxable revenues from the recovery of non-deductible expenses (where the revenues from resuming certain provisions for guaranties and of other provisions represented a significant part);
- Fiscal facilities representing the tax exemption on profit corresponding to the investments made in accordance with Art.22 of the Fiscal Code;

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS
FOR 30 JUNE 2017

(unless specified otherwise, all amounts are stated in thousand lei)

- Non-deductible expenses in fiscal terms (expenses concerning the set-up or increase of certain provisions which are non-deductible fiscally, expenses with fiscally non-deductible accounting amortization; losses from receivables a.o.)

The deferred tax is determined for the temporary differences arising between the fiscal basis of calculation for the tax on assets and liabilities and their accounting value. The deferred tax is calculated using the tax rates expected to apply to the temporary differences when they are resumed, under the law applicable at the reporting date.

The company estimated and registered debts regarding the deferred tax related to immobilized assets (coming from differences between the accounting and fiscal values, different durations of useful lifespans, ao) and reserves and recognized receivables related to the deferred tax regarding the provisions for warranties granted to customers, of other provisions for risks and expenses as well as adjustments for the depreciation of customers receivables.

The structure of deferred tax as on 30.06.2017 is:

Debts from deferred tax	Amounts (thousand lei)
1. Debts on deferred tax generated by differences between the basis of accounting (bigger) and fiscal ones (smaller) of the immobilized assets	4.290
2. Debts on deferred tax related to legal reserve	1.559
3. Debts on deferred tax related to reserves from the fiscal facility	6.383
4. Debts on deferred tax related to the reported result representing a surplus realised from revaluation reserves	59
Total debts on deferred tax	12.291

Receivables from deferred tax

Receivables from deferred tax related to adjustment for clients depreciation in 2010	38
Receivables from deferred tax related to provisions for risks and expenses established in 2010	1.030
Receivables from deferred tax related to provisions for guarantees granted to customers set in 2014-2016	6.171
Receivables regarding deferred tax regarding provisions for employee benefits	550

Total Receivables from deferred tax **7.789**

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(unless stated otherwise, all the amounts are expressed in thousands of lei)

NOTE 8-INVENTORIES

	<u>30.06.2017</u>	<u>31.12.2016</u>
Raw materials	14.723	11.139
Consumables	23.998	23.270
Other materials	145	14
Semifinished products	48	48
Packings	5	2
Finished products	11.975	11.918
Products in progress	36.639	20.063
Merchandise	-	3
Adjustments for depreciation of inventories	<u>(24.640)</u>	<u>(16.185)</u>
TOTAL	<u>62.893</u>	<u>50.272</u>

The inventories are evaluated at cost value or net achievable value, whichever is lower. The net achievable value is the estimated sale price of inventories minus all estimated costs of completion and the necessary costs for sale.

The cost of the inventories includes: purchase costs, conversion costs as well as other costs incurred to bring the inventories in their current condition and in the present location. At the release from accounts, the inventories are evaluated and recorded in the accounting system by applying the Average Weighted Cost method.

The value adjustments are made on a regular basis, based on the findings of the inventory committees and/or managers of the facility, in order to present the assets at the lower value between cost and net achievable value.

The Company considers as depreciated those goods which are older than the storage period established by internal decision of the Board of Directors.

The total value of the inventories recognized as expense during the reported timeperiod is 59.965 thousand lei.

The company has no pledge set on inventories.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(all amounts are expressed in thousands lei unless specified otherwise)

NOTE 9- FINANCIAL INSTRUMENTS

A financial instrument is any contract generating simultaneously a financial asset for an entity and a financial debt or a company capital instrument for another entity.

The financial assets and debts are recognized when AEROSTAR SA becomes part of the contractual provisions of the instrument.

On the reporting date AEROSTAR S.A. does not hold:

- financial instruments kept for making transactions (including derived instruments)
- financial instruments kept till due date
- financial instruments available for sale

The financial assets of AEROSTAR S.A. include:

- cash and cash equivalents
- commercial receivables
- commercial effects received
- immobilized receivables (customer-guaranties)
- loans granted with interest

The financial debts of AEROSTAR S.A. include:

- commercial debts
- commercial effects to pay

On the reporting date AEROSTAR does not have financial debts concerning financial leasing, overdrafts and long-term bank loans.

The main types of risks generated by the financial instruments held, to which AEROSTAR S.A is exposed are:

- a) credit risk
- b) liquidity risk,
- c) currency risk,
- d) interest rate risk.

a) Credit risk

The credit risk is the risk that one of the parties involved in a financial instrument generates a financial loss for the other party as a result of the failure to meet a contractual obligation, related mainly to cash, cash equivalents and commercial receivables.

The cash and cash equivalents are placed only at first-rank bank institutions considered to have a high solvency rate.

In certain cases, specific instruments will be requested for credit risk mitigation (down payments, letters of bank guarantee for customers with good payment records, confirmed letters of credit for export).

AEROSTAR has no significant exposure toward a single partner and records no significant concentration of receivables on a single geographical area.

Exposure to credit risk

The accounting value of the financial assets, net of the depreciation adjustments, represents the maximum exposure to the credit risk.

The maximum exposure to the credit risk on the reporting date was:

	30.06.2017	30.06.2016
Cash and cash equivalent	145.932	111.803

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(all amounts are expressed in thousands lei unless specified otherwise)

Commercial receivables net of depreciation adjustments	42.728	48.177
Commercial effects collected	76	75
Immobilized receivables (customer warranties)	0	433
Loand granted with interest	92	102
Total	188.828	160.590

The maximum exposure to the crediting risk on geographical areas for the commercial receivables net of depreciation adjustments is:

	30.06.2017	30.06.2016
Domestic market	9.247	7.309
Countries in euro zone	15.785	20.597
Great Britain	13.496	11.494
Other regions	4.200	8.777
Total	42.728	48.177

Depreciation adjustments

Structure on duration age of gross commercial receivables on reporting date was:

	Gross Value 30.06.2017	Adjustments for depreciation 30.06.2017	Gross Value 30.06.2016	Adjustments for depreciation 30.06.2016
Within due time	42.728	0	47.669	0
Outstanding, total of which:	1.157	1.157	2.680	2.172
1-30 days	0	0	329	0
31-60 days	0	0	521	453
61-90 days	285	285	49	0
91-120 days	143	143	62	0
Over 120 days	490	490	1.475	1.475
Over 1 year	239	239	244	244
Total	43.885	1.157	50.349	2.172

The motion of adjustments for depreciation of commercial receivables during the year is presented in the following table:

	30.06.2017	30.06.2016
Balance as on 1 January	1.024	254
Adjustments for depreciation set	4.777	4.249
Adjustments for depreciations resumed as revenues	(4.644)	(2.331)
Balance as on 30 June	1.157	2.172

On 30.06.2017, 97% of the commercial receivable in balance are related to customers with good payment records.

b) Liquidity risk

The liquidity risk is the risk that AEROSTAR encounters difficulties to meet the obligations associated to the financial debts which are settled by cash delivery.

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(all amounts are expressed in thousands lei unless specified otherwise)

AEROSTAR policy regarding this risk is to maintain an optimum level of liquidity so as to pay for the liabilities, as they become due.

To evaluate the liquidity risk, the treasury cash flows from operations, from investments and from financing operations are monitored and reviewed weekly, monthly, quarterly and yearly in order to determine the estimated level of net liquidity modifications.

Also, the specific liquidity indicators are analyzed monthly (general liquidity, immediate liquidity and rate of general solvency) against the budgeted levels.

Besides, in order to reduce the liquidity risk, AEROSTAR maintains annually a liquidity reserve as a Credit Line (usable as an overdraft) granted by banks to a maximum limit of 2,500 thousand USD.

The time intervals used to review the contractual due dates of the financial debts, with a view to highlighting the placement of cash flows in due time, are shown in the table below:

	Financial Debts	Accounting value	Contractual cash flows	0-30 days	31-60 days	Over 60 days
30.06. 2017	Commercial Debts	24.864	(24.864)	(18.169)	(4.673)	(2.022)
	Commercial effects to pay	2	(2)	(2)	0	0
30.06. 2016	Commercial Debts	23.270	(23.270)	(17.255)	(4.837)	(1.178)
	Commercial effects to pay	19	(19)	0	0	(19)

The cash flows included in the analyses of the due dates are not anticipated to take place sooner or at significantly different values.

On the reporting date AEROSTAR has in its records no financial debts related to financial leasing, bank account overdraft and long-term bank accounts.

On 30.06.2017 AEROSTAR has in its records no overdue financial debts.

c) Foreign currency risk

The foreign currency risk is the risk that the fair value or future treasury cash flows of a financial instrument fluctuate because of the changes in the currency exchange rates.

Exposure to the foreign exchange currency risk

AEROSTAR is exposed to the foreign currency risks, as 84% of its turnover during the reporting period is denominated in USD and EUR, while a significant part of the operating expenses relates to LEI.

Thus, AEROSTAR is exposed to the risk of being affected by the exchange rate fluctuations both in its net revenues and in its financial position, as they are stated in Lei.

The net exposure to foreign currency risk of the assets and financial debts is presented below based on the financial-accounting values denominated in foreign currency recorded at the end of the reporting period:

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(all amounts are expressed in thousands lei unless specified otherwise)

30.06.2017	Thousands EUR	Thousands USD	Thousands GBP
Cash and cash equivalents	291	2.566	28
Commercial receivables	1.176	7.058	0
Commercial debts	(1.663)	(2.237)	(103)
Net Exposure , in original currency	(196)	7.387	(75)

Sensitivity analysis

Taking into consideration the net exposure calculated in the above table it can be considered that AEROSTAR is exposed mainly to the foreign exchange risk generated by the variation of the foreign exchange rate USD/RON.

Taking into consideration the statistics for the period 01.01.2015-30.06.2017 a relatively high volatility is observed for the foreign exchange rate USD/RON (9% in the year 2015 and 2% in 2016, 3% in first half 2017). So, a reasonably possible variation of 7% can be taken into consideration at the end of the reporting period.

The following table details the effect of reasonably possible variations of the USD/RON exchange rates over the financial year of AEROSTAR.

30.06.2017	
Net exposure, in original currency (thousands USD)	7.387
Currency exchange rate USD/RON	3.99
Net exposure, in operational currency	29.474
Reasonable possible variation for the currency exchange rate	+/- 7%
Effect of the variation on the profit and loss account	2.063 thousand LEI

d) Interest rate risk

For the reporting period AEROSTAR has contracted a Credit Facility of 7,000 thousand USD, intended for financing the company's operations, which includes:

- 1) A cash sub-limit in the amount of 2,500 thousand USD, usable as an overdraft, set up to provide at any given time the necessary financial liquidity and flexibility (liquidity reserve);
- 2) A non-cash sub-limit in the amount of 4,500 thousand USD, usable to guarantee for the contractual commercial obligations by issuing letters of bank guarantee and import letters of credit.

The interest is applicable only for the overdraft utilized, within the sub-limit of 2,500 thousand USD.

As during the reporting period AEROSTAR did not use the cash sub-limit of 2.500 thousand USD, the company revenues and cash flows are independent from the interest rate variations on the banking market.

On 30.06.2017, the level of guarantees granted by AEROSTAR under commercial agreements, by issue of bank guarantee letters amounts to 3.278 thousands USD (equivalent to 13.065 thousand LEI).

As on 30.06.2017 no mortgages are set on the property assets owned by AEROSTAR.

- VAT not exigible	141	339
- <i>excises to recover related to fuel consumption</i>	311	792
Interest to receive from bank deposits	252	17
Other receivables	1.289	576
TOTAL	53.193	42.749

¹⁾ Uncertain customers are recorded in a distinctive mode in the company accounts.

To cover the risk of non-recovery of the amounts representing uncertain receivables, the company recorded adjustments for depreciation of uncertain customers at the integral value thereof.

When determining the recoverability of a commercial receivable, we took into account the changes occurred in the customer's credit rating from the time when the credit was granted till the time of reporting.

The receivables expressed in foreign currency were evaluated at the market exchange rate communicated by the National Bank of Romania to close the month of June 2017.

The favorable and unfavorable differences between the market exchange rate used for accounts of the receivables in foreign currency and the market exchange rate communicated by the National Bank of Romania for the end of June 2017 were recorded in the related revenue or expense account from the exchange rate differences, as applicable.

S.C. AEROSTAR S.A. BACAU

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(all amounts are expressed in thousands lei unless specified otherwise)

At the end of June 2017 the company made undertakings as bank guarantee letters in amount of 3.278.000 USD issued in favor of the business partners in accordance with the contractual requirements.

The exchange rate differences, favorable or unfavorable, between the market exchange rate at which the debts in foreign currencies are registered and the market exchange rate communicated by the National Bank of Romania for the end of June 2017, were registered in the corresponding account – revenues or expenses – from the exchange rate differences, as applicable.

The dividends in balance as on 30 June 2017, in amount of 14.906 thousand lei represent:

- 13.705 thousand lei- dividends allocated from the profit of the year **2016**, which will be paid on the date of 20 September (payment date decided by the shareholders in the ordinary general meeting of 20 April 2017).
- 591 thousand lei- the amount to be transferred by AEROSTAR for the payment of dividends corresponding to **year 2015** for the shareholders who did not collect them from CEC Bank S.A. desks (the paying agent designated by AEROSTAR).
- 488 thousand lei – the amount remaining to be transferred by AEROSTAR for the payment of the dividends corresponding to **year 2014** for the shareholders who did not collect them from CEC Bank S.A. desks (the paying agent designated by AEROSTAR).
- 122 thousand lei – the remaining amount to be transferred by AEROSTAR for the payment of the dividends corresponding to **year 2013** for the shareholders who did not collect them from CEC Bank S.A. desks (the paying agent designated by AEROSTAR).

S.C. AEROSTAR S.A. BACAU
NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS FOR 30 JUNE 2017
(all amounts are expressed in thousands lei unless specified otherwise)

NOTE 12 – CASH AND CASH EQUIVALENTS

At the end of the reporting period the cash and cash equivalents consists of:

	30.06.2017	30.06.2016
Cash	2.861	2.679
Bank deposits	143.000	109.078
Cheques and commercial effects to collect	50	25
Collateral deposits	21	21
Cash and cash equivalents in the treasury cash flows statement	145.932	111.803

The cash comprises the available current amounts in cashier's desk account and at banks;

The cash equivalents comprise:

- short-terms bank deposits
- cheques and commercial effects (promisory notes) deposited in banks to collect
- collateral deposits set up in accordance with the legal requirements with the Local Customs Department in Bacau with a view to securing the payment of current customs obligations (customs taxes and VAT).

The treasury balance is influenced by the advance payments and payments received from the customers.

There are no restrictions on the liquidity accounts in the banks.

The value of the credit facilities not used as on 30.06.2017 and available for future operations is 9.964 thousand LEI (2,500 thousand USD).

The value of treasury flows allocated for increasing the operating capacity is 6% of the aggregate value of the cash used.

NOTE 20 - SUBSIDIES

Subsidies related to assets

The method of presentation of the asset-related subsidies in the financial statements recognizes the subsidy as deferred revenue recognized systematically in the profit or loss throughout the useful lifetime of the asset.

	30.06.2017	30.06.2016
Balance on 1 January	14.972	16.828
Subsidies related to assets	0	0
Subsidies registered as revenues corresponding to calculated amortization	(1.139)	(926)
Balance on 30 June	13.833	15.902

The balance of 13.833 thousand Lei represents subsidies related to investments in immobilized assets, to be registered under revenues corresponding to the calculated amortization.

The subsidies related to the immobilized assets were received for the implementation of 3 investment projects under 3 non-reimbursable financing agreements:

1. Contract no. 210304/22.04.2010: "Extension of the manufacturing and assembly capacities for aerostructures for civil aviation", performed between April 2010 and October 2012, the value of the subsidy received from the Ministry of Economy, Trade and Business Environment (MECMA) being of 5,468 thousand Lei;
2. Contract no. 229226/14.06.2012: "Set-up of a new manufacturing capacity for diversifying production and export growth", performed between June 2012 and May 2014, the value of the subsidy received from the Ministry of Economy, Trade and Business Environment (MECMA) being of 6.011 thousand Lei;
3. Contract no. 5IM/013/24.03.2015: "Consolidation and sustainable development of the mechanical processing and painting sectors by high performance investments", performed between March and December 2015, the value of the subsidy received from the Ministry of European Funds (MFE) being of 8,299 thousand Lei;

All investment projects in immobilized assets were implemented and finalized in accordance with the contractual provisions assumed.

CONTRACT no 129 / 15.12.2015

**REPORT
REGARDING THE REVISION
OF THE INTERIM INDIVIDUAL FINANCIAL STATEMENTS
AS ON 30.06.2017**

TO THE SHAREHOLDERS OF S.C. AEROSTAR S.A.

Introduction:

We have audited the interim individual financial statements prepared by S.C. AEROSTAR S.A. („The Company”) as on 30.06.2017, which comprise: the individual Statement of the Financial Position, the individual Statement of Profit or Loss, Other Elements of the Global Result, the individual Statement of Company Capital Modifications, the individual Statement of Treasury Cash Flows, Notes to the Individual Financial Statements. The six months accounting reporting is accompanied by the Report of the Board of Directors, the Declaration of the Company Management in accordance with the Accounting Law No. 82/1991 republished and the Regulation no. 1/2006 issued by CNVM, currently the Financial Supervisory Authority („ASF”).

It is the responsibility of the company management to prepare and adequately present the interim individual financial information in accordance with Order of the Public Finance Minister no 2844/2016 for the approval of the accounting Regulations in accordance with the International Financial Reporting Standards, applicable to companies whose securities are admitted for trading on a regular market, the Law no 24/2017 regarding the issuers of financial instruments and market operations, IAS 34 “Interim Financial Reporting” and the general frame for the accounting reporting applicable as on 30 June 2017.

This responsibility includes: design, implement and maintain a relevant internal control with respect to prepare and faithful presentation of the individual accounting reports, which are free of significant misrepresentations due to error or fraud; for the selection and application of adequate accounting policies; for reasonable accounting estimates in the circumstances given.

Our responsibility is to express a conclusion on these interim individual financial statements based on our review made in accordance with the International Auditing

Standards. Such standards require that we comply with the ethical requirements and plan and make our review with a view to obtain reasonable assurance that the accounting reports are free of significant misrepresentations.

Scope of revision

We performed our revision in accordance with the Auditing Standards adopted by the chamber of Financial Auditors of Romania and more precisely with the International Standard for the Revision Tasks “Review of the interim individual financial statements made by an independent auditor of the entity”. The revision of the interim financial information consists of performing interview and investigation activities in special with the personnel of the company in charge with the financial and accounting activities and apply the analytical procedures, as well as other revision procedures. The scope of application of a revision is substantially more reduced compared to an audit made in accordance with the International Auditing Standards, as adopted by the Chamber of Financial Auditors of Romania, and therefore we cannot obtain the assurance that we will be aware of all the significant aspects which may be identified during an auditing process. So, we do not express an audit opinion.

Conclusion

Based on the revision made, nothing draw up our attention meaning to make us believe that the interim half year individual financial reporting as made for 30 June 2017, attached herewith, identified with the following elements

- company capitals 225.481.238 lei;
- total revenues184.972.505 lei;
- net result of the reporting period 25.212.551 lei

do not provide a fair and faithful image of the financial position of the entity for the date of 30.06.2017, of its financial performance and treasury cash flows for the six months period ended on the respective date, in accordance with the general accounting reporting frame applicable in 30 June 2017, i.e.

Order of Public Finance Minister no 857/2017 for the approval of the accounting reporting system for 30 June 2017 for the economic operators, as well as for setting certain accounting aspects, with the Order of Public Finance Minister no 2844/2016 for the approval of the accounting regulations compliant with the International Financial Reporting Standards applicable to the companies whose securities are admitted to trading on a regular market, and IAs 34 “Interim Financial Reporting”.

Other aspects

This report is addressed exclusively to the company's shareholders as a whole. Our revision was performed in order to be able to report to the company's shareholders those aspects which must be reported in a revision report, and in no other purpose. To the extent permitted by law, we do not accept and do not assume responsibility for our revision, for this report or for conclusions made except solely towards the company and its shareholders as a whole.

The individual half year accounting reports attached are not meant to present the financial position, the result of the operations and a set of annual explanatory notes in accordance with the regulations and accounting principles accepted in countries and jurisdictions other than Romania. Therefore, the individual half year accounting reports are not prepared for the use of the persons who do not know the accounting and legal regulations of Romania inclusively the general accounting reporting frame applicable for 30 June 2017, as well as the MFP Order no. 2844/2016 for the approval of the accounting regulations in accordance with the International Financial Reporting Standards, applicable in companies whose shares are admitted for trading on a regular market,

Report on the conformance of the Report of the Board of Directors with the interim individual financial statements on 30.06.2017

In accordance with the requirements of the Financial Supervisory Authority („ASF”) we read the Report of the Board of Directors. This is attached to the interim individual financial statements. Our opinion on the interim individual financial statements does not cover the Report of the Board of Directors.

With reference to our audit regarding the interim individual financial statements we read the attached Report of the Board of Directors and we found out as follows:

- a) we did not identify information in the Report of the Board of Directors which is not consistent, in all the significant aspects, with the information presented in the attached interim individual financial statements
- b) the Report of the Board of Directors above includes, in all significant aspects, the information required by the legal accounting regulations regarding the interim individual financial statements;
- c) based on our knowledge and understanding, as obtained during the auditing of the individual annual financial statements, for the period 01.01.2017 – 30.06.2017,

with reference to S.C. AEROSTAR S.A., and to its environment, we did not identify misleading information to be included in the Report of the Board of Directors.
